Unlimit Your Data! Now chatr customers have more choice with new plans

Launching in the Greater Toronto Area, Calgary and Edmonton, customers will now have more flexibility with unlimited talk, text and data at 3G speeds while in zones

TORONTO (April 20, 2016) From chatting with friends to emailing on the go, never worry about going over limits again. With chatr mobile's new plans, customers have the freedom to stay connected with family and friends without incurring overage fees. In addition to unlimited talk and text, these new zone-based plans now also offer customers unlimited data with managed 3G speed allotments in the Greater Toronto Area, Calgary and Edmonton.

"Whether they are just arriving in Canada or entering a new chapter in their lives, we understand that our customers are looking to stay connected at an affordable price. With these unlimited zone-based plans, we are providing them with more choices that are simple to understand, cost-effective and worry-free," says Shailendra Gujarati, VP, chatr mobile.

Starting at \$40/month, plans include unlimited Canada-wide talk, unlimited Canada and International text and unlimited data with a managed 3G speed allotment while within the unlimited data zones. For additional data:

- \$5/month (total \$45) upgrade to a total of 2GB at 3G speed
- \$10/month (total \$50) upgrade to a total of 4GB at 3G speed

While at 3G data speeds, customers can generally browse, email, watch videos, use social media and share large files. Once a customer reaches their managed 3G speed allotment, they can still continue using unlimited data at a reduced speed (2G speed) where they will generally be able to browse and email but will notice a difference when using higher bandwidth applications such as streaming video or downloading large files. For usage status, customers can dial *225#.

While in any of three zones, customers will continue to experience unlimited service. When out-of-zone, [pay-per-use charges](#) will apply. To check whether they are in or out of zone, customers can dial *#555#.
